DETAILED ACTION

Claim Objections

1. Claims 2 and 3 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Due to the fact that claim 1 is an apparatus claim and not a method claim.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "the end distal of said portion" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Wisselink (U.S. 5,984,955).

Wisselink discloses in figures 1 and 2, a guiding catheter (32) for guiding a guidewire (30), wherein said guidewire (30) having a main portion biased into a first configuration, a first section with a first curvature and a second section having a second different curvature to that of said first section (see fig. 2a-2c).

6. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Dehdashtian et al. (U.S. 6,451,053).

Dehdashtian et al discloses in figures 1-16, a guiding catheter (130) for guiding a guidewire (128), wherein said guidewire (128) having a main portion biased into a first configuration, a first section with a first curvature and a second section having a second different curvature to that of said first section.
